

# The principles of inspection

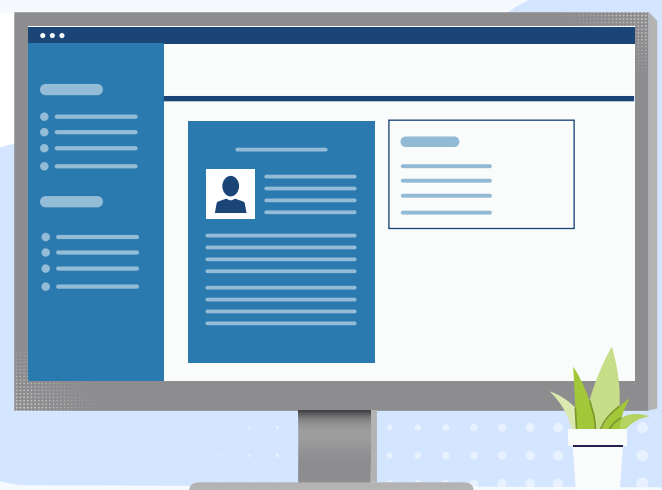

1.

With learners at the heart of every inspection, we always focus clearly on the quality of teaching and learning.

2.

We'll always report on what's working well and what needs improving.

3.

We adapt our approach to each individual provider.

4.

We use tailored methodologies that take into account each provider's circumstance, in order to fully evaluate robustly and fairly.

5.

We want to help ensure a professional learning experience that benefits everyone.
